Secure Etch: A System Theft Deterrent

Secure Etch is a vehicle identification system that leaves a permanent record in your vehicle's windshield, side and rear glass. This proven system makes it impossible for thieves to remove your unique vehicle ID number without defacing or replacing the glass.

Professional thieves steal cars they can sell quickly and easily. They will not steal a car they cannot sell. By installing the Secure Etch ID system on your vehicle's glass, you make it harder for a thief to sell your car, and therefore, a far less desirable target.

Our Benefits

During the benefit period, if your vehicle is stolen and not recovered within 30 days, SECURE ETCH can provide you up to \$5,000!*

In addition, many automobile insurance companies offer rate discounts for vehicles that have the SECURE ETCH system.

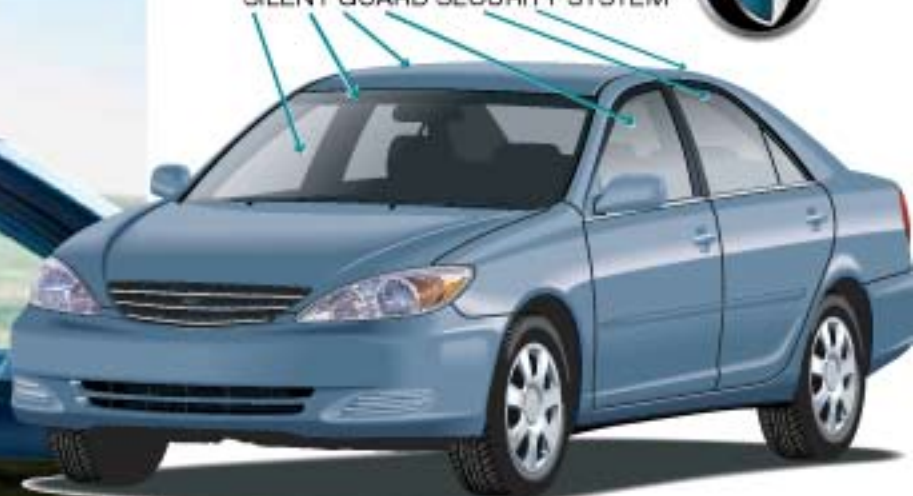

Installation is simple and quick. Just ask your salesperson or finance manager for details.**

* Benefit amounts may vary by state.

** Please refer to the Secure Etch agreement or Certificate of Limited Warranty for specific details, benefits, exclusions, benefit period, and limitations.
